### **What is Surrender?**

Scriptures say that like the Fish which is surrendered to the river, happily swimming upstream we should surrender to God to cross over the ocean of finite and turbulent material energy caused by the Maya, the indescribable power of the Lord.

The act of surrender to the Supreme Eternal Infinite Absolute Reality who we call 'God' can be achieved by following these six steps given in Vedic scriptures :

1. Desire only in accordance with God's will. (As directed by your Conscience)
2. Do not desire anything against God's will.
3. Always believe that there is one Great Father - GOD to protect, save and bless you and always practice his Presence.
4. Develop the attitude of gratitude for all his blessings, every moment.
- 5, Remember always that all your possessions, those of others and all the things in this world are only God's possessions. Nothing belongs to you.
6. Surrender yourself completely to him - including your pride that you have surrendered to him.

Accepting your present situation and consideration for others are the two great qualities you will acquire, when this surrender happens.

The Power of Selfless Love is God and the Love for Power is Ego.
